

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### **Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ## PREFACE.

The plan of this class list is that of a single alphabet of authors and titles. Entry is made under the best known form of the author's name, with cross references from other forms of the name. Anonymous books are entered under the title only. Titles are entered under the first word not an article, followed by the author's surname.

Under the author's name the titles are arranged alphabetically, and in the case of a series, in the order in which the books should be read.

## PREFACE.

This class list includes all books in the classes of Philosophy and Religion arranged according to the divisions of the Decimal classification. The form of entry is that of the author card of the dictionary card catalogue.

The symbol at the right-hand side of the page, opposite each title, is the number to be used in calling for the book, and should be copied exactly. Call numbers preceded by the letter "r" designate books in the reference collection, which cannot be taken from the Library. Those preceded by the letters "D," "F," "G" and "Sw" designate books in the Danish-Norwegian, French, German and Swedish languages.

## PREFACE.

---

This class list includes all books in the class of Sociology arranged according to the divisions of the Decimal classification. The form of entry is that of the author card of the dictionary card catalogue.

The symbol at the right-hand side of the page, opposite each title, is the number to be used in calling for the book, and should be copied exactly. Call numbers preceded by the letter "r" designate books in the reference collection, which cannot be taken from the Library. Those preceded by the letters "D," "F," "G," "I," "S," and "Sw" designate books in the Danish-Norwegian, French, German, Italian, Spanish and Swedish languages.

In the author list at the end, the reference "See" refers to the class-division, not the page; for example "See 305" will refer to the division 305. Periodicals.
